¹Returns and periods are measured in a rolling time period fashion, beginning in the first full period and rolling over month-by-month. The indicated fund rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all dividends or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Returns of one year or more are annualized. Risk level presented is as per the prospectus for the portfolio. Please read the prospectus for more information on the risks of investing in this portfolio. This document is not a Funds Fact Sheet. Income and capital gains are distributed if available. Quartile rankings are a measurement of how a mutual fund performs when compared with other funds within the same competitive universe. The Investment Funds Standards Committee defines peer groups. Funddata produces the rankings (first quartile is best; fourth quartile is lowest). Each fund is also assigned an available benchmark index(es) which best reflects the investment guidelines of the fund or category.
